

SCIENTIFUR
ISSN 0105-2403
Vol. 25, No. 2
December, 2001

1.	Contents	39
2.	Notes	43
	Notes from the Group of Editors	43
3.	Abstracts	45
	Effect of space and floor material on the behaviour of farmed blue foxes. <i>H.T. Korhonen, P. Niemelä, L. Jauhiainen</i>	45
	Extent of digging and its possible underlying causal factors in penned blue foxes. <i>H. Korhonen, P. Niemelä, I. Wikman</i>	45
	Physiological and behavioural responses in blue foxes (<i>Alopex lagopus</i>): comparisons between space quantity and floor material. <i>H. Korhonen, L. Jauhiainen, P. Niemelä, M. Harri, R. Sauna-aho</i>	45
	Temperament and reproductive performance in farmed sable. <i>H. Korhonen, P. Niemelä, P. Siirilä</i>	46
4.	Symposiums and Congresses	47
	<u>NJF-Seminar No 331, 2001</u>	47
	Assessment of mink welfare at farm level. <i>S.H. Møller, S.W. Hansen</i>	48
	Water requirement in farmed mink. <i>R. Oppermann Moe, L. Lønne Dille, M. Bakken</i>	48
	Action plan for welfare improvement in fur animals. <i>L. Lønne Dille, R. Oppermann Moe, S. Gil Westersjø</i>	48
	Stress-related behavioural and physiological responses in blue foxes housed in cage and pen environment. <i>H. Korhonen, L. Jauhiainen, P. Niemelä, M. Harri, R. Sauna-aho</i>	49
	Plasma concentrations of leptin mirror changes in body weight but do not influence the pattern of the pre-ovulatory luteinizing hormone (LH) surge in mink (<i>Mustela vison</i>). <i>A.-H. Tauson, M. Forsberg, A. Chwalibog</i>	49

Dietary protein, fat and carbohydrate supply to lactating mink (<i>Mustela vison</i>) – Effect on glucose homeostasis, energy metabolism and milk production. <i>R. Fink, A.-H. Tauson, C. Friis Børsting</i>	50
The functionality of the intestine in mink (<i>Mustela vison</i>) kits. <i>J. Elnif, R.K. Buddington, C. Malo, P.T. Sangild, N. Enggaard Hansen</i>	50
Substrate oxidation in male blue foxes (<i>Alopex Lagopus</i>) during feeding, fasting and realimentation. <i>A.-H. Tauson, A. Chwalibog, Ø. Ahlstrøm</i>	50
Farm trial on fish-free diet with low protein content in blue foxes (<i>Alopex lagopus</i>). <i>T. Dahlman, I. Pölönen, H. Jäykkä, K. Valkosalo, T. Jalava</i>	51
Use of rapeseed and lupin products in mink feed. <i>C.L. Bagger, C. Bjergegaard, T.N. Clausen, H. Sørensen</i>	51
Meat-and-bone meal as feed for blue fox and mink in the reproduction period. <i>Ø. Ahlstrøm, A. Skrede</i>	51
Growth and development of mink (fur animals) in relation to type and quality of dietary lipids. <i>H. Sørensen</i>	52
MinkAstrovirus – epidemiology and possible prophylaxis. <i>C. Mittelholzer, L. Englund, M. Chriél, H.H. Dietz, K.O. Hedlund, L. Svensson</i>	52
Blue fox pelt characteristics in relation to pelting date. <i>L. Blomstedt, M. Miettinen, I. Pölönen</i>	53
Length and quality of mink skins from early or late pelting season. <i>S.H. Møller</i>	53
Testing standard worksheets and e-mail in "Pelsdyrkontrollen". Live grading depends on fast communication to the central database. <i>K.-R. Johannessen, E. Børsting, H. Kristiansen</i>	53
Heritability for birth date and effect of mating date in mink (<i>Mustela vison</i>). <i>M. Fredberg, U. Lund Rasmussen, P. Berg, P. Sandbøl</i>	54
Alternative measures for prediction of maternal and kit effects on early kit growth in mink. <i>B. Krogh Hansen, P. Berg</i>	54
The use of stable isotopes to determine the origin of American mink (<i>Mustela vison</i>) caught in the wild – preliminary results. <i>M. Hammershøj, T. Asferg, B. Buchardt Westergaard</i>	55
E-mail groups as a communication tool in fur science and fur business. <i>E. Børsting</i>	55
Digestibility of feed with different ash content from meat-and-bone meal in mink. <i>O. Sylte Heggset, Ø. Ahlstrøm, A. Skrede</i>	56
New mutants of American mink (<i>Mustela vison</i>) (Names for new mink mutants confirmed). <i>U. Lund Rasmussen, K.-R. Johannessen, K. Smeds, M.B. Jonsson, G. Lagerkvist, O. Lohi</i>	56
Effects of different activity objects on dental health in silver foxes. <i>L. Lønne Dille, R. Oppermann Moe, M. Bakken, G. Sanson</i>	56
A new system to record behaviour around birth: Observations on deliveries of mink kits.	

<i>J. Malmkvist, B. Houbak</i>	57
<u>Problems of ecological physiology – fur animals, Petrozavodsk, 2000</u>	58
Seasonal rearrangements in the isoenzymatic profile of lactate dehydrogenase in the organs of mink and polar foxes. <i>N. N. Tyutyunnik, L. K. Kozhevnikova, A. R. Unzhakov, H. I. Meldo</i>	60
Comparative study of lactate dehydrogenase enzymes in tissues of minks and polecats. <i>A. R. Unzhakov</i>	60
Specific indices of thiamine profile of minks during acute oxythiamine deficiency. <i>G. G. Petrova, T. N. Ilyina, N. N. Tyutyunnik, I. P. Chernikevich</i>	60
Thiamine status during modelling B1-deficiency in reproductive period of minks. <i>T. N. Ilyina, G. G. Petrova, I. P. Chernikevich</i>	61
Vitamin B1 metabolism in mink cubs in different biological periods and growth phases. <i>R. V. Trebukhina, I. P. Chernikevich, L. K. Lashak, V. G. Petushok, T. A. Lychko, O.V. Krivehya</i>	61
Leukocytes alkaline phosphatase in mink in reproduction period. <i>L. B. Uzenbayeva</i>	61
Genetic polymorphism in marmots. <i>E. A. Tinaeva, L. G. Markovich, T. I. Kazakova, G. A. Fedoseeva, V. N. Pomytko</i>	61
Testing of interferon status in fur-bearing animals. <i>L. Ye. Boyarintsev, N. N. Tyutyunnik, K. N. Gruzdev</i>	61
Evaluation of immune status in adult mink. <i>L. Ye. Boyarintsev, N. N. Tyutyunnik, V. V. Klimenko, A. G. Schahoy</i>	62
The use of biologically active substances for raising of efficiency in farmed minks. <i>N. A. Balakirev, T. M. Demina, O. V. Rastimeshina</i>	62
Digestive hydrolases level in the blood of predatory fur-bearing animals at different periods of year. <i>V. M. Oleinik, E. B. Svetchkina</i>	62
The reaction of enzyme spectrum of digestive tract in herbivorous fur-bearing animals under the changing of qualitative composition of ration. <i>B. Barabasz, V. M. Oleinik</i>	62
The hormonal status in fur animals in the postnatal ontogenesis period and reproductive season. <i>L. N. Sirotkina, N. N. Tyutyunnik</i>	62
The analysis of genetic and environmental factors' influence on reproduction indexes of American mink. <i>A. V. Kharlamova, O. V. Trapezov</i>	63
Fodder stress and conflict between animals of different behaviour types. <i>O. V. Trapezov, O. V. Antonenko, I. N. Oskina, R. G. Gulevich</i>	63
Embryonic mortality in mink: Morphological analysis of preimplantation embryonic loss. <i>E. A. Kizilova, A. N. Golubitsa, A. I. Zhelezova, S. I. Baiborodin</i>	63
Influence of vitamin E on physiological state, milk composition and productivity of blue fox	

(Alopex lagopus). V. Ilukha, L. Kozhevnikova, M. Valtonen, S. Kasanen, H. Meldo, N. Tyutyunnik	63
Reproduction disturbances in female blue foxes. <i>O. Szeleszczuk, P. Niedbala, G. Maloszyk, V. Ilukha</i>	63
Attempts to improve reproductive performance of farmed foxes. <i>M. Harri, J. Mononen, T. Rekilä, L. Ahola, T. Pyykönen</i>	64
Effect of the enlarged breeding nest box on reproductive success of blue foxes (Alopex lagopus). <i>T. Rekilä, M. Harri, L. Jalkanen</i>	64
The effect of genotype and physiological condition on the content of some minerals in the fur of coypu females. <i>D. Mertin, K. Süvegova, P. Fl'ak, P. Sviatko, J. Tocka</i>	64
Digestibility of nitrogen and fats from feed rations for minks at various proportions of poultry by-products. <i>D. Mertin, K. Süvegova, J. Tocka, P. Fl'ak, Z. Ceresnakova, E. Podolanova, B. Barabasz</i>	65
<u>The effect of the diet on mink performance and environment</u> <u>Danish Institute of Agricultural Sciences, September, 2001</u>	67
Prediction of the nutritive value of feedstuffs and feeds for mink by a new in vitro method. <i>H. Nygaard Lærke, S. Boisen, C. Hejlesen</i>	67
The influence of the biological and hygienic quality of raw-materials and mink feed on the health status of the mink. <i>M. Lassén</i>	67
Energy consumption in the lactation period. <i>B. Krogh Hansen</i>	68
Reduce protein to lactating mink! <i>R. Fink, A.-H. Tauson, C.F. Børsting</i>	68
Protein requirement to mink kits in the growing-furring period. <i>B.M. Damgaard, T.N. Clausen</i>	69
Variations in dietary protein levels influence hair growth and pelt quality in mink. <i>P.V. Rasmussen, C.F. Børsting</i>	69
Feeding and drinking behaviour in mink: correlations between feed intake and stereotypies and activity parameters. <i>S.W. Hansen, E.L. Decker</i>	70
Feeding routines and feeding management in relation to energy requirement of the mink. <i>S. H. Møller</i>	70
Ammonia emission and nitrogen balances in mink houses. <i>S. Pedersen</i>	71
Excretion of nutrients from mink and effects on the environment. <i>C.F. Børsting, S.H. Møller</i>	71
Environmental restrictions! – possible adjustments? <i>P. Sandbøl</i>	72
5. New books	73
Nutrient and energy metabolism in the lactating mink (Mustela vison). <i>Ph.D. Thesis by Rikke Fink</i>	73
